butt that requires the services of an experienced butt-tender?

I offer two, non-surgical methods to treat hemorrhoids.

One reduces the blood flow that feeds the hemorrhoids, improving inflammation and causing them to shrink.

The other is better suited to removing larger hemorrhoids. Both take just a few seconds to do. Since they are performed in an area with no nerve endings, they can be administered right in the comfort of my office without anesthesia.

There is virtually no pain, no prep needed, there are no major restrictions, and you don’t have to take time off of work. Consultations are free of charge and our procedures are covered by insurance.
