

# Do you mask your butt?

by Dr. David Gutman,  
*Advanced Hemorrhoid Specialists*

Is your problem in disguise?  
Undercover? Masked?

Most people suffering from hemorrhoids live a double life. On the surface they're all smiles, but under the cover of a dark pair of pants lurks the pain, itch and bleeding of hemorrhoids.

They've been masking the truth for so long, keeping their pesky little problem under wraps has become a regular part of life. And "regular" life has become a series of missed events, excuses, embarrassment, and dread.

It's time to come out of hiding and get back to the activities you once enjoyed. Your bike becons, your golf clubs have missed you, and your socially-distanced calendar is about to be filled.

No more excuses for missing out on life's big and little pleasures.

Here's how I can help you get your rear back in gear—and that mask can come off, once and for all.

I offer two, non-surgical methods to

David  
Gutman, MD

treat hemorrhoids. One reduces the blood flow that feeds the hemorrhoids, improving inflammation and causing them to shrink. The other is better suited to removing larger hemorrhoids. Both take just a few seconds to do. Since they are performed in an area with no nerve endings, they can be administered right in the comfort of my office without anesthesia.

There is virtually no pain, no prep needed, there are no major restrictions, and you don't have to take time off of work. Consultations are free of charge and our procedures are covered by insurance.
